At Aquatrix we offer top-of-the-line 3 Layer Roto Moulded Tanks that are designed to meet all your water storage needs. Whether you require a reliable solution for residential, commercial, or industrial purposes, our tanks are engineered to provide durability, longevity, and unmatched performance.

Superior Quality Materials: Our tanks are manufactured using the highest quality polyethylene materials, ensuring they are tough, UV-resistant, and corrosion-free. This guarantees a long lifespan and zero maintenance worries.

Triple Layer and four layer Technology: aquatrix tanks come in both double and triple-layer variants. The additional layers provide extra strength, prevent leakage, and maintain the water's purity, making them ideal for storing potable water.

Efficient Roto Moulding Process: We employ advanced roto moulding technology to craft tanks with uniform thickness and smooth surfaces. This ensures structural integrity and minimizes the risk of weak points or leaks.

Wide Range of Capacities: Our tanks are available in a variety of sizes, ranging from small household units to large industrial tanks, catering to the diverse needs of our customers.

Easy Installation: aquatrix tanks are designed for hassle-free installation, whether you're a DIY enthusiast or prefer professional installation.

Loft tanks are specifically designed and manufactured for indoor kitchen and household purposes. They are rectangular in shape and can be easily accommodated in kitchens and other spaces efficiently. Aquatrix Loft Tanks are an innovative and efficient solution for water storage, designed to fit seamlessly into compact spaces. Ideal for installation in lofts, attics, and other tight areas, these tanks maximise available space without compromising on capacity or quality.

Why choose Aquatrix Loft Water Tanks

Aquatrix Loft Water Tanks are constructed from high-quality, food-grade plastic, ensuring the stored water remains safe and hygienic. Their robust design includes features like UV stabilisation to prevent degradation from sunlight, making them durable and long-lasting. Available in 150 to 1000 litres capacity, Aquatrix Loft Water Tanks are perfect for both residential and commercial applications, providing an additional reliable water storage solution. With Aquatrix Loft Water Tanks, you can ensure efficient water management while maintaining the integrity and safety of your water supply.

What are the Advantages of Using Loft Water Tanks?

Space crunch: Loft water tanks are specially designed to fulfil water requirements in the kitchen. Being rectangular in size, these tanks can easily be installed at the rooftop, kitchen or balcony, without obstructing the available space.
